| Product Description        | 4-Methyl-3-[[4-(3-pyridinyl)-2-pyrimidinyl]amino]-benzoic Acid N-Oxide O-Ethyl is an intermediate in synthesizing Nilotinib N-Oxide (N465310), which is a metabolite of Nilotinib (N465300). Molecular Formula: C <sub>19</sub> H <sub>18</sub> N <sub>4</sub> O <sub>3</sub> Solubility: Chloroform, DMF, DM... |
| Molecular Weight           | 350.37                                                                                                                                                                                                                                                                                                           |
