| Product Description        | Dipropyl Sodium Phosphate is used in the preparation of alkyl thiopyrophosphates. Molecular Formula: C <sub>6</sub> H <sub>15</sub> NaO <sub>4</sub> P Molecular Weight: 205.14 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the original vial prior to remo... |
| Molecular Weight           | 205.14                                                                                                                                                                                                                                                                                               |
