| Category                   | Biochemikalien                                                                                                                                                                                                                                                                                      |
| Product Description        | An anabolic steroid used as an antineoplastic. Molecular Formula: C <sub>23</sub> H <sub>36</sub> O <sub>3</sub> Solubility: Chloroform, Methanol Molecular Weight: 360.53 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the original vial prior to removing... |
| Molecular Weight           | 360.53                                                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a White Solid                                                                                                                                                                                                                                                                           |
