| Product Description        | Irbesartan-d7 2,2,2-Trifluoroacetate Salt is the labelled Irbesartan (I751000), an angiotensin II type 1 (AT1)-receptor antagonist. Molecular Formula: C <sub>27</sub> H <sub>22</sub> D <sub>7</sub> F <sub>3</sub> N <sub>6</sub> O <sub>3</sub> Solubility: Chloroform (Slightly), Methanol (Slightly) Molecular Weight: 549.6 Stor... |
| Molecular Weight           | 549.6                                                                                                                                                                                                                                                                                                                                     |
| Form                       | Supplied as a Pale Beige to Light Yellow Solid                                                                                                                                                                                                                                                                                            |
