| Product Description        | N-Acetyl-D-cysteine is an isomer of N-Acetyl Cysteine which can act as a radioprotectant against many aspects of oxidative damage due to high dose irradiation. Molecular Formula: C <sub>5</sub> H <sub>9</sub> NO <sub>3</sub> S Solubility: DMSO (Slightly), Methanol (Slightly), Water (Slig... |
| Molecular Weight           | 163.19                                                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a White Solid                                                                                                                                                                                                                                                                           |
