| Category                   | Biochemikalien                                                                                                                                                                                                                                                                          |
| Product Description        | (S)-(1-((4-Azidobutyl)amino)-4-methyl-1-oxopentan-2-yl)carbamic Acid tert-Butyl Ester is an intermediate in the synthesis of derivative of E-64 an inhibitor of cathepsins B and L as well as a potential inhibitor of calpain. Molecular Formula: C <sub>15</sub> H <sub>29</sub> N... |
| Molecular Weight           | 327.42                                                                                                                                                                                                                                                                                  |
| Form                       | Supplied as a Light Yellow Liquid                                                                                                                                                                                                                                                       |
