| Product Description        | Suberoylanilide Hydroxamic Acid beta-D-Glucuronide is a metabolite (MI) of Suberoylanilide Hydroxamic Acid. Molecular Formula: C <sub>20</sub> H <sub>27</sub> N <sub>2</sub> NaO <sub>9</sub> Solubility: Water (Slightly) Molecular Weight: 462.43 Storage and Stability: Store at -20C. For maximum recove... |
| Molecular Weight           | 462.43                                                                                                                                                                                                                                                                                                           |
| Form                       | Supplied as a White Solid                                                                                                                                                                                                                                                                                        |
