| Product Description        | Tricyclohexylguanidine is used as a catalyst in various syntheses such as transesterification of soybean oil. Also used as a catalysts in the aldol addition and condensation of acetone to benzaldehyde. Molecular Formula: C <sub>19</sub> H <sub>35</sub> N <sub>3</sub> Molecular Weight: 30... |
| Molecular Weight           | 305.5                                                                                                                                                                                                                                                                                               |
