| Product Description        | Vanadium(IV) Oxide Acetylacetonate is used as a catalyst in organic chemistry and is also an intermediate in synthetic reactions, such as the synthesis of novel oxovanadium complexes that display antitumor activity. Molecular Formula: C <sub>10</sub> H <sub>14</sub> O <sub>5</sub> V Molec... |
| Molecular Weight           | 265.16                                                                                                                                                                                                                                                                                               |
| CAS Number                 | [3153-26-2]                                                                                                                                                                                                                                                                                          |
