| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | GSKIP encodes a protein that is involved as a negative regulator of GSK3-beta in the Wnt signaling pathway. The encoded protein may play a role in the retinoic acid signaling pathway by regulating the functional interactions between GSK3-beta, beta-c... |
