| Category                   | Molekularbiologie                                                                                                                                                                                                                                              |
| Application                | WB                                                                                                                                                                                                                                                             |
| Product Description        | Putative human homologs of the protooncogene v-akt of the acutely transforming retrovirus AKT8 have been cloned. These protein-serine/threonine kinase proteins have a catalytic domain closely related to both PKA and PKC and have been designated rac (...) |
| Purity                     | ( 90%).                                                                                                                                                                                                                                                        |
| Form                       | Supplied in SDS-PAGE sample buffer (reduced).                                                                                                                                                                                                                  |
