| Product Description        | Biotin-labeled Nucleotides are used for non-fluorescent labeling of nucleic acids in purification and detection applications. Molecular Formula: C <sub>26</sub> H <sub>44</sub> N <sub>9</sub> O <sub>16</sub> P <sub>3</sub> S (free acid) Molecular Weight: 863.66 (free acid) pH: 7.5 0.5 Storage and Stability: May be... |
| Molecular Weight           | 863.66                                                                                                                                                                                                                                                                                                                         |
| Purity                     | 95% (HPLC)                                                                                                                                                                                                                                                                                                                     |
| Form                       | Supplied as a liquid in buffered solution, pH 7.5. Labeled with Biotin.                                                                                                                                                                                                                                                        |
