| Product Description        | RNA editing is an important mechanism for regulating genetic plasticity through the generation of alternative protein products from a single structural gene. Substitutional RNA editing employs a variety of genetic mechanisms, the biochemical basis of w... |
| Purity                     | Purified                                                                                                                                                                                                                                                        |
| Form                       | Supplied as a lyophilized powder from PBS, 0.05% sodium azide.                                                                                                                                                                                                  |
