| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | Synthetic thrombin inhibitor. Melting Point: 179-185C Solubility: DMSO, Methanol Method for Determining Identity: Proton NMR (DMSO-d6) Spectroscopic and Mass Spectrometric Analysis TLC Conditions: SiO2, Dichloromethane: Methanol, Acetate Acid = 8ml: ... |
| Molecular Weight           | 508.63                                                                                                                                                                                                                                                        |
| Purity                     | ~90%                                                                                                                                                                                                                                                          |
| Form                       | Supplied as a white solid.                                                                                                                                                                                                                                    |
| CAS Number                 | [74863-84-6]                                                                                                                                                                                                                                                  |
