| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | WB                                                                                                                                                                                                                                                            |
| Product Description        | Cadherins are a family of CA2+ dependent intercellular adhesion molecules that play a central role in controlling morphogenetic movements during development. Their function is regulated by association with the actin cytoskeleton by a complex of cytop... |
| Purity                     | 95+% HPLC, Mass Spec                                                                                                                                                                                                                                          |
| Form                       | Supplied as a white to off-white lyophilized powder.                                                                                                                                                                                                          |
