| Product Description        | Carboxypeptidase B (CPB) catalyzes hydrolysis of the basic amino acids, lysine, arginine, and ornithine from the C-terminal position in polypeptides. It occurs as a zymogen in the pancreas of most vertebrates. Synonyms: EC=3.4.17.2, Porcine pancreas, ... |
| Molecular Weight           | 34.5                                                                                                                                                                                                                                                           |
