| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | ELISA                                                                                                                                                                                                                                                         |
| Product Description        | Pentraxins family of proteins acquired the name from their ability to form pentameric (or decameric) structures formed by non-covalent interactions. C-reactive protein (CRP or PTX1, mature chain 206 aa, chromosome 1q21-23) nonglycosylated, ~24kD mono... |
| Purity                     | Purified                                                                                                                                                                                                                                                      |
| Form                       | Supplied as a liquid in PBS, pH 7.2, 0.09% sodium azide.                                                                                                                                                                                                      |
