| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Acidic fibroblast growth factor(aFGF) belongs to the fibroblast growth factor family. It is a potent mitogenic agent. aFGF has been detected in large amounts in the brain. Other cells known to express FGF acidic include hepatocytes, vascular smooth m... |
| Molecular Weight           | 15.9                                                                                                                                                                                                                                                          |
| Purity                     | 95% by SDS PAGE                                                                                                                                                                                                                                               |
| Form                       | Supplied as a liquid in 20mM Tris, pH 7.0, 100mM sodium chloride.                                                                                                                                                                                             |
