| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | ELISA, WB                                                                                                                                                                                                                                                     |
| Product Description        | An 11-AA peptide sequence near the C-terminus of mouse Glut-8 (1) was used to generate antibodies. A cysteine has been added at the NH2 terminus for coupling to KLH. Most mammalian cells transport glucose through a family of membrane proteins known a... |
| Purity                     | Highly purified                                                                                                                                                                                                                                               |
| Form                       | Supplied as a liquid in PBS, pH 7.2                                                                                                                                                                                                                           |
