| Category                   | Molekularbiologie                                                                                                                                                                                                                                                |
| Application                | ELISA                                                                                                                                                                                                                                                            |
| Product Description        | This recombinant HCV (subtype 1a) protein is made in yeast cells. It covers from methionine 1 to glycine 120 of the HCV polyprotein. It is a fusion protein with human superoxide dismutase (SOD).<br>Applications: Suitable for use in ELISA. Other applicat... |
| Molecular Weight           | 36                                                                                                                                                                                                                                                               |
| Purity                     | 90%                                                                                                                                                                                                                                                              |
| Form                       | Supplied in sodium borate, pH 9.5, 10mM thiocyanate, 10mM DTT, 5mM EDTA.                                                                                                                                                                                         |
