| Manufacturer               | US Biological                                                                                                                                                                                                                                                 |
| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Coupling Ratio: ~10-20 moles of biotin per mole tat. Biological Activity: Biotin tat binds to solid phase murine anti-tat mAb and human rHexim1 as determined by capture ELISA using strepavidin-HRP as a secondary reagent. Applications: Suitable for us... |
| Purity                     | Purified by ion affinity and reverse phase HPLC to 99% as determined by SDS-PAGE and HPLC.                                                                                                                                                                    |
| Form                       | Supplied as a liquid in PBS, pH 7.2, 1% BSA, 0.01% Thimersol. Labeled with Biotin.                                                                                                                                                                            |
