| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | WB                                                                                                                                                                                                                                                            |
| Product Description        | The glycolytic enzyme enolase (2-phospho-Dglycerate hydrolyase) exists as several dimeric isoenzymes (aa, ab, ag, bb and gg) composed of three distinct subunits: a, b, and g (alpha, beta, and gamma). Three isoenzymes are found in human brain: aa, ag,... |
| Molecular Weight           | 52                                                                                                                                                                                                                                                            |
| Purity                     | Purified (~90%)                                                                                                                                                                                                                                               |
| Form                       | Supplied as a lyophilized powder from PBS, 0.05% sodium azide.                                                                                                                                                                                                |
