| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Nucleohistone is a sodium-containing complex of histone and DNA. DNA is combined, as nucleohistone, with histone proteins in the chromosomes and nuclei of all cells except bacteria. It has been suggested that histones are involved in regulating gene ... |
| Form                       | Supplied as a dialyzed, lyophilized powder.                                                                                                                                                                                                                   |
