| Manufacturer | Biorbyt |
| Category | Kits/Assays |
| Species Reactivity | Rat |
| Product Description | Rat Hyaluronic Acid (HA) ELISA Kit... |
| Range | 15.63-1000 ng/mL |
| Sensitivity | 4.94 ng/mL |
| Samples | Serum, plasma and other biological fluids |
| Application Notes | <p>Application Notes: standard: 1000 ng/mL. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Rat HA protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat HA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat HA in the samples is then determined by comparing the OD of the samples to the standard curve</p> |
