Application Notes	Biological Origin: <i>Macaca mulatta</i> (Rhesus macaque). Biological Activity: Measured by its binding ability in a functional ELISA. Immobilized <i>Macaca mulatta</i> IFNG at 2 µg/mL can bind anti-IFNG recombinant antibody. The EC50 is 35.23-38.98 ng/mL. Application Notes: We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference
