## Product Datasheet

### Human Insulin Receptor (ISR) ELISA Kit BYT-ORB776503

Article Name	Human Insulin Receptor (ISR) ELISA Kit
Biozol Catalog Number	BYT-ORB776503
Supplier Catalog Number	orb776503
Alternative Catalog Number	BYT-ORB776503-48, BYT-ORB776503-96
Manufacturer	Biorbyt
Category	Kits/Assays
Application	ELISA
Species Reactivity	Human
Product Description	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Insulin Receptor(ISR)....
Concentration	100 ng/mL
Range	1.57-100 ng/mL
Sensitivity	0.54 ng/mL
UniProt	<a href="#">P06213</a>
Samples	Tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes

Application Notes: standard: 100 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human ISR. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human ISR. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human ISR, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human ISR in the samples is then determined by comparing the OD of the samples to the standard curve
