### Goat Follicle Stimulating Hormone (FSH) ELISA Kit BYT-ORB781578

Article Name	Goat Follicle Stimulating Hormone (FSH) ELISA Kit
Biozol Catalog Number	BYT-ORB781578
Supplier Catalog Number	orb781578
Alternative Catalog Number	BYT-ORB781578-48, BYT-ORB781578-96
Manufacturer	Biorbyt
Category	Kits/Assays
Application	ELISA
Species Reactivity	Goat
Product Description	This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Follicle Stimulating Hormone(FSH) protein. Standards or samples are added to the appropriate microtiter pla...
Concentration	180 mIU/mL
Range	2.82-180 ng/mL
Sensitivity	0.83 ng/mL
Samples	serum, plasma and other biological fluids

Application Notes

Application Notes: standard: 180 mIU/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Goat FSH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Goat FSH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Goat FSH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Goat FSH in the samples is then determined by comparing the OD of the samples to the standard curve
