Product Datasheet

General Cyclic Adenosine Monophosphate (cAMP) ELISA Kit BYT-ORB781952

Article Name	General Cyclic Adenosine Monophosphate (cAMP) ELISA Kit
Biozol Catalog Number	BYT-ORB781952
Supplier Catalog Number	orb781952
Alternative Catalog Number	BYT-ORB781952-48, BYT-ORB781952-96
Manufacturer	Biorbyt
Category	Kits/Assays
Application	ELISA
Species Reactivity	All
Product Description	This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Cyclic Adenosine Monophosphate(cAMP) protein. Standards or samples are added to the appropriate microtiter ...
Concentration	20000 pg/mL
Range	312.5-20000 pg/mL
Sensitivity	92.2 pg/mL
Samples	serum, plasma, cell lysates, cell culture supernates and other biological fluids

Application Notes

Application Notes: standard: 20000 pg/mL. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with cAMP protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to cAMP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of cAMP in the samples is then determined by comparing the OD of the samples to the standard curve
