Product Datasheet

Sheep Immunoglobulin E (IgE) ELISA Kit BYT-ORB782520

Article Name	Sheep Immunoglobulin E (IgE) ELISA Kit
Biozol Catalog Number	BYT-ORB782520
Supplier Catalog Number	orb782520
Alternative Catalog Number	BYT-ORB782520-48, BYT-ORB782520-96
Manufacturer	Biorbyt
Category	Kits/Assays
Application	ELISA
Species Reactivity	Sheep
Product Description	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Immunoglobulin E(IgE)...
Concentration	10 µg/mL
Range	0.16-10 µg/mL
Sensitivity	0.062 µg/mL
Samples	Serum, plasma and other biological fluids

Application Notes

Application Notes: standard: 10 µg/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Sheep IgE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Sheep IgE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Sheep IgE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Sheep IgE in the samples is then determined by comparing the OD of the samples to the standard curve
