## Product Datasheet

### Cattle Procollagen III N-Terminal Propeptide (PIIINP) ELISA Kit BYT-ORB782551

Article Name	Cattle Procollagen III N-Terminal Propeptide (PIIINP) ELISA Kit
Biozol Catalog Number	BYT-ORB782551
Supplier Catalog Number	orb782551
Alternative Catalog Number	BYT-ORB782551-48, BYT-ORB782551-96
Manufacturer	Biorbyt
Category	Kits/Assays
Application	ELISA
Species Reactivity	Bovine
Product Description	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Procollagen III N-Terminal Propeptide(PIIINP)....
Concentration	400 ng/mL
Range	6.25-400 ng/mL
Sensitivity	2.29 ng/mL
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes

Application Notes: standard: 400 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle PIIINP. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle PIIINP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle PIIINP, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Cattle PIIINP in the samples is then determined by comparing the OD of the samples to the standard curve
