| Immunogen                  | Recombinant full-length human WT1 protein                                                                                                                                                                                                                     |
| Product Description        | Recognizes a 47-55kDa-tumor suppressor protein, identified as Wilms Tumor (WT1) protein. The antibody reacts with all isoforms of the full-length WT1 and also identifies WT1 lacking exon 2-encoded amino acids, frequently found in subsets of sporadic ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
