| Immunogen                  | Synthetic peptide corresponding to aa1-24 of human ACTH                                                                                                                                                                                                       |
| Product Description        | ACTH (same as Corticotropin) is a 39 amino acid active peptide produced by the anterior pituitary. This MAb is specific to Synacthen (aa1-24 of ACTH), does not react with CLIP (aa17-39 of ACTH). POMC (pro-opiomelanocortin or corticotropin-lipotropin)... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
