| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | Source : Escherichia Coli. MEMO1 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 322 amino acids (1-297 a.a) and having a molecular mass of 36.4kDa.MEMO1 is fused to a 25 amino acid His-tag at N-terminu... |
| Purity                     | Greater than 95.0% as determined by SDS-PAGE.                                                                                                                                                                                                                 |
| Antibody Type              | Recombinant Antibody                                                                                                                                                                                                                                          |
