| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Recombinant human CD25 protein was used as an imunogen for this antidody.                                                                                                                                                                                     |
| Conjugation                | PE                                                                                                                                                                                                                                                            |
| Product Description        | CD25 is the alpha chain of the IL-2 receptor. It is a type I transmembrane protein present on activated T cells, activated B cells, some thymocytes, myeloid precursors, and oligodendrocytes that associates with CD122 to form a heterodimer that can ac... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
