| Application                | FACS, WB                                                                                                                                                                                                                                                      |
| Species Reactivity         | Mouse                                                                                                                                                                                                                                                         |
| Immunogen                  | A partial length recombinant mTLR3 protein (amino acids 180-400) was used as the immunogen for this antibody.                                                                                                                                                 |
| Product Description        | Mouse Toll-like receptor 3 (mTLR3) belongs to a family of evolutionary conserved innate immune recognition molecules and recognizes double-stranded RNA, a molecular pattern associated with viral infections. It has seven exons. mTlr3 show high homolog... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
