| Immunogen                  | A partial length recombinant AIMP1 protein (amino acids 100-310) was used as the immunogen for this antibody.                                                                                                                                                 |
| Product Description        | Aminoacyl tRNA synthetase complex-interacting multifunctional protein 1 is a protein that in humans is encoded by the AIMP1 gene. AIMP1 is an inflammatory cytokine that is induced by apoptosis. AIMP1 is also involved in the control of angiogenesis, w... |
