| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | A partial length recombinant KLF10 protein (amino acids 11-221) was used as the immunogen for this antibody.                                                                                                                                                  |
| Product Description        | Kruppel-like factor 10 (KLF10 ) is a member of the Kruppel-like family of transcription factors, which are known to be involved in anti-proliferative and apoptotic inducing functions following TGF-beta induction. KLF10 plays an important role in the ... |
