| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | A partial length recombinant DDX18 protein (amino acids 20-300) was used as the immunogen for this antibody.                                                                                                                                                  |
| Product Description        | DDX18 belongs to the DEAD box family and is involved in several cellular responses such as transcription initiation, splicing and spliceosome assembly. Along with motifs common to the DEAD box family members, DDX18 also contains a conserved Myc/Max b... |
