| Immunogen                  | Recombinant full-length human Interleukin 10 (IL10) protein                                                                                                                                                                                                   |
| Product Description        | Interleukin 10 (IL10) is a cytokine produced primarily by monocytes and to a lesser extent by lymphocytes. This cytokine has pleiotropic effects in immuno-regulation and inflammation. It down-regulates the expression of Th1 cytokines, MHC class II an... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [IL10/2651R]                                                                                                                                                                                                                                                  |
