| Immunogen                  | Recombinant full-length human LAG3 protein                                                                                                                                                                                                                    |
| Product Description        | LAG-3 (also called CD223) is a high affinity MHC class II ligand present on the surface of CD4+CD8+ T cells and NK cell, with shared homology in structure to CD4 molecules. It has a glutamic acid-proline (EP) repetitive sequence found in other functi... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [LAG3/3261]                                                                                                                                                                                                                                                   |
| NCBI                       | <a href="#">3902</a>                                                                                                                                                                                                                                          |

|                    |                                                                |
