| Immunogen                  | Recombinant human SPTBN2 fragment (aa356-475) (exact sequence is proprietary)                                                                                                                                                                                  |
| Product Description        | Spectrin is an actin binding protein that is a major component of the plasma membrane skeleton. Spectrins function as membrane organizers and stabilizers by forming dimers, tetramers and higher polymers. Vertebrate spectrins have two alpha-subunits (...) |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                     |
| Clone Designation          | [SPTBN2/2887R]                                                                                                                                                                                                                                                 |
