| Immunogen                  | PDCD1 transfected BHK cells                                                                                                                                                                                                                                   |
| Product Description        | PD-1 is expressed on a subset of CD4-CD8-thymocytes, and on activated T and B cells. PD-1 is thought to be involved in lymphocyte clonal selection and peripheral tolerance. The PD-1 ligands, PD-L1 (also known as B7-H1) and PD-L2 (B7-DC), are members ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [RMP1-14]                                                                                                                                                                                                                                                     |
