| Immunogen                  | Full length human HSC70                                                                                                                                                                                                                                       |
| Conjugation                | PerCP                                                                                                                                                                                                                                                         |
| Product Description        | HSP70 genes encode abundant heat-inducible 70-kDa HSPs (HSP70s). In most eukaryotes HSP70 genes exist as part of a multigene family. They are found in most cellular compartments of eukaryotes including nuclei, mitochondria, chloroplasts, the endoplas... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [1F2-H5]                                                                                                                                                                                                                                                      |
| NCBI                       | <a href="#">3312</a>                                                                                                                                                                                                                                          |

|                    |                                                                                             |
