| Category                   | Proteine/Peptide                                                                                                                   |
| Species Reactivity         | Mouse                                                                                                                              |
| Product Description        | Recombinant Mouse PILRA Protein is expressed from HEK293 with hFc (IgG1) tag at the C-Terminus.It contains Glu32-Val197....        |
| Molecular Weight           | The protein has a predicted MW of 45.4 kDa. Due to glycosylation, the protein migrates to 70-75 kDa based on Bis-Tris PAGE result. |
| Tag                        | C-hFc (IgG1)                                                                                                                       |
| UniProt                    | <a href="#">Q2YFS3</a>                                                                                                             |
| Buffer                     | Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.     |
| Expression System          | HEK293                                                                                                                             |
| Purity                     | > 95% as determined by Bis-Tris PAGE,> 95% as determined by HPLC                                                                   |
| Form                       | Lyophilized                                                                                                                        |
| Sequence                   | Glu32-Val197                                                                                                                       |
