| Product Description        | Furosemide sodium (Frusemide Sodium) is a potent and orally active inhibitor of Na <sup>+</sup> /K <sup>+</sup> /2Cl <sup>-</sup> (NKCC) cotransporter, NKCC1 and NKCC2. Furosemide sodium is also a GABAA receptors antagonist and displays 100-fold selectivity for alpha6-containing receptor... |
| Molecular Weight           | 352.73                                                                                                                                                                                                                                                                                              |
