| Product Description        | 6-alkyne NAD <sup>+</sup> sodium (6-Parg NAD sodium) is a clickable signaling molecule and enzyme cofactor in NAD <sup>+</sup> form. It is used in conjunction with fluorescence labeling for detecting poly(ADP-ribose) polymerase (PARP) protein substrates.... |
| Molecular Weight           | 723.46                                                                                                                                                                                                                                                            |
