| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | The A chain is responsible for inhibiting protein synthesis through the catalytic inactivation of 60S ribosomal subunits by removing adenine from position 4,324 of 28S rRNA. Abrin-a is more toxic than ricin., The B chain is a galactose-specific lecti... |
