Product Datasheet

Sheep anti Human IgD (Fc specific), Clone: [Polyclonal], Monoclonal NMB-SHAHU/IGD(FC)

Article Name	Sheep anti Human IgD (Fc specific), Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-SHAHU/IGD(FC)
Supplier Catalog Number	ShAHu/IgD(Fc)
Alternative Catalog Number	NMB-SHAHU/IGD(FC)
Manufacturer	NordicMubio
Host	Sheep
Category	Antikörper
Species Reactivity	Human
Conjugation	Unconjugated
Format	Antiserum
Target Specificity	IgD
Cross-Adsorption (MinX)	no cross-adsorbtion
Product Description	The reactivity of the antiserum is restricted to the Fc part of the IgD molecule. In immunoelectrophoresis and radial immunodiffusion, using various antiserum concentrations against appropriate concentrations of the immunogen, a single precipitin lin...
Clonality	Monoclonal
Clone Designation	[Polyclonal]

Buffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal sheep serum. No foreign proteins added. Reconstitute the lyophilised
Source	Highly purified homogenous IgD isolated from human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
Formula	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal sheep serum. No foreign proteins added.
Antibody Type	Secondary Antibody
Application Notes	Precipitation assays. The lyophilized antiserum is shipped at ambient temperature and may be stored at +4C, prolonged storage at or below -20C. In immunoelectrophoresis use 2 µl serum or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl serum samples (neat and serially diluted) in 2 mm diameter peripheral wells.
