| Category                   | Antikörper                                                                                                                                                                                                                                                 |
| Application                | FC                                                                                                                                                                                                                                                         |
| Species Reactivity         | Human                                                                                                                                                                                                                                                      |
| Immunogen                  | 2 N-terminal domains of human CD4 fused to human IgG1 Fc                                                                                                                                                                                                   |
| Conjugation                | FITC                                                                                                                                                                                                                                                       |
| Product Description        | CD4 (T4) is a single chain transmembrane glycoprotein and belongs to immunoglobulin supergene family. In extracellular region there are 4 immunoglobulin-like domains (1 Ig-like V-type and 3 Ig-like C2-type). Transmembrane region forms 25 aa, cytoplas |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                 |
| Clone Designation          | [MEM-241]                                                                                                                                                                                                                                                  |
| Isotype                    | Mouse IgG1                                                                                                                                                                                                                                                 |
| Buffer                     | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                                                                                                                                                                                    |
| Storage                    | 2°C to 8°C                                                                                                                                                                                                                                                 |

| Target             | CD4                                                                                                                                                                                                                     |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Antibody Type      | Monoclonal Antibody                                                                                                                                                                                                     |
| Application Dilute | Flow cytometry: The reagent is designed for analysis of human blood cells using 20 $\mu$ l reagent / 100 $\mu$ l of whole blood or 106 cells in a suspension. The content of a vial (2 ml) is sufficient for 100 tests. |
| Application Notes  | Flow cytometry: The reagent is designed for analysis of human blood cells using 20 $\mu$ l reagent / 100 $\mu$ l of whole blood or 106 cells in a suspension. The content of a vial (2 ml) is sufficient for 100 tests. |
