| Application                | WB                                                                                                                                                                                                                                                         |
| Product Description        | Guanine nucleotide exchange factors (GEFs) activate the small GTPases by catalyzing the exchange of GDP for GTP. Our Active Rac-GEF Assay Kit employs the visible agarose bead technology used in our Small GTPase Activation Assays to pull down the acti |
